

Disagree with this proposal in its entirety. This country should never remove the requirement for Morse Code. All the FCC needs to do is look at the past history of the Citizens Band, which once belong to amateur radio. If nothing else I hope the FCC learns from the mistakes it has made in the past.

If a new no-code HF license privilege is issue, please make the call sign easy to identify to insure the new class of licenses are operating within the FCC regulations. (ex. KAA4YRP)
